

## JCU publications – Kimbe Bay

- Almany GR, Berumen ML, Thorrold SR, Planes S, Jones GP (2007) Local replenishment of coral reef fish populations in a marine reserve. *Science* 316:742-744
- Almany GR, Connolly SR, Heath DD, Hogan JD, Jones GP, McCook LJ, Mills M, Pressey RL, Williamson DH (2009) Connectivity, biodiversity conservation, and the design of marine reserve networks for coral reefs. *Coral Reefs* 28:339-351
- Almany GR, Hamilton RJ, Williamson DH, Evans RD, Jones GP, Matawai M, Potuku T, Rhodes KL, Russ GR, Sawynok B (2010) Getting communities involved in marine protected area research: two case studies from Papua New Guinea and Australia. *Coral Reefs* 29:567-576.
- Almany GR, Planes S, Thorrold SR, Berumen ML, Bode M, Saenz Agudelo P, Messmer V, Srinivasan M, Harrison HB, Williamson DH, Bonin MC, Frisch AJ, Sinclair Taylor TH, Nanninga GB, Priest MA, Jones GP (2017) Larval fish dispersal in a coral reef seascape. *Nature Ecology and Evolution* 1,0148. doi: 10.1038/s41559-017-0148
- Bean K, Jones GP, Caley MJ (2002) Relationships among distribution, abundance and habitat specialisation in a guild of coral reef triggerfish (family Balistidae). *Marine Ecology Progress Series* 233:263-279
- Beger M, Jones GP, Munday PL (2003) Conservation of coral reef biodiversity: a comparison of reserve selection procedures for corals and fishes. *Biological Conservation* 111:53-62
- Beger M, Jones GP, Possingham HP (2006) A method of statistical modelling of coral reef fish distribution: can it aid conservation planning in data poor regions? *Proceedings of the 10<sup>th</sup> International Coral Reef Symposium, Okinawa*, pp. 1445-1456
- Beger M, Possingham HP (2008) Environmental factors that influence the distribution of coral reef fishes: modeling occurrence data for broad-scale conservation and management. *Marine Ecology Progress Series* 361:1–13
- Berkström C, Jones GP, McCormick MI, Srinivasan M (2012) Ecological versatility and consequences for the distribution and abundance of coral reef wrasses. *Marine Ecology Progress Series* 461:151-163.
- Berkström C, McCormick MI, Jones GP (2014) Trade-offs in the ecological versatility of juvenile wrasses: an experimental evaluation. *Journal of Experimental Marine Biology and Ecology* 453:91-97.

- Berumen ML, Almany GR, Planes S, Jones GP, Saenz-Agudelo P, Thorrold SR (2012) Persistence of self-recruitment and patterns of larval connectivity in a marine protected area network. *Ecology and Evolution* 2:444-452.
- Berumen ML, Walsh HJ, Raventos N, Planes S, Jones GP, Thorrold SR (2010) Otolith geochemistry does not reflect dispersal history of clownfish larvae. *Coral Reefs* 29:883-891.
- Bonin MC (2012) Specializing on vulnerable habitat: *Acropora* selectivity among damselfish recruits and the risk of bleaching-induced habitat loss. *Coral Reefs* 31:287-297.
- Bonin MC, Almany GR, Jones GP (2011) Contrasting and interactive effects of habitat loss and fragmentation on coral-associated reef fishes. *Ecology* 92:1503–1512.
- Bonin MC, Boström-Einarsson L, Munday PL, Jones GP (2015) The prevalence and importance of competition among coral reef fishes. *Annual Reviews in Ecology, Evolution and Systematics* 46:169–190. doi:10.1146/annurev-ecolsys-112414-054413
- Bonin MC, Munday PL, McCormick MI, Srinivasan M, Jones GP (2009) Recruitment and persistence of coral-dwelling fishes is resilient to bleaching but not mortality of host corals. *Marine Ecology Progress Series* 394:215–222
- Bonin MC, Saenz-Agudelo P, Harrison HB, Nanninga G, van der Meer MH, Mansour H, Perumal S, Jones GP, Berumen ML (2016) Characterization and cross-amplification of microsatellite markers in four species of anemonefish (Pomacentridae, Amphiprion spp.). *Marine Biodiversity* 46:135-140. doi:10.1007/s12526-015-0336-6
- Bonin MC, Srinivasan M, Almany GR, Jones GP (2009) Interactive effects of interspecific competition and microhabitat on early post-settlement survival in a coral reef fish. *Coral Reefs* 28:265-274
- Boström-Einarsson L, Bonin MC, Munday PL, Jones GP (2013) Strong intraspecific competition and habitat selectivity influence abundance of a coral-dwelling damselfish. *Journal of Experimental Marine Biology and Ecology* 448:85-92.
- Boström-Einarsson L, Bonin MC, Munday PL, Jones GP (2014) Habitat degradation modifies the strength of interspecific competition in coral dwelling damselfishes. *Ecology*, in press
- Boström-Einarsson L, Bonin MC, Munday PL, Jones GP (2014) Habitat degradation modifies the strength of interspecific competition in coral dwelling damselfishes. *Ecology* 95:3056-3067. doi:10.1890/13-1345.1

- Bostrom-Einersson L, Bonin MC, Munday PL, Jones GP (2018) Loss of live coral compromises predator-avoidance behaviour in coral reef damselfish. *Scientific Reports*, in press
- Botsford LW, White JW, Coffroth M-A, Paris CB, Planes S, Shearer TL, Thorrold SR, Jones GP (2009) Measuring connectivity and estimating resilience of coral reef metapopulations in MPAs: matching empirical efforts to modelling needs. *Coral Reefs* 28:327-337
